

NEW!
Sterile Spatula

Disposable smartSpatulas®**

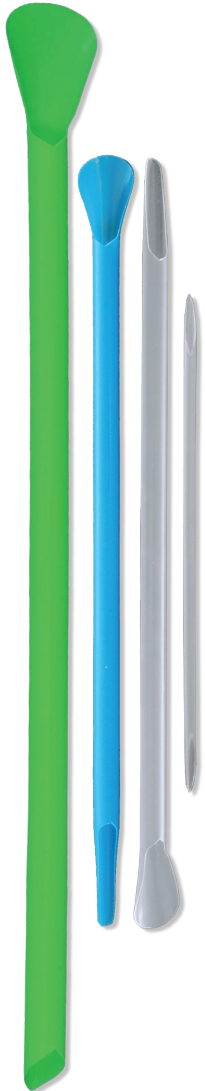

Used for sample handling and manipulation in labs across the country.

These versatile spatulas can be used to scoop, scrape or stir. Made of virgin polypropylene, smartSpatulas® are an economic alternative to reusable spatulas.

Available in 3 convenient sizes: Macro-Green 310 mm, Standard-Blue and Standard-Opaque 210 mm, and Antistatic-Micro 140 mm.

smartSpatulas® are autoclavable for sterile applications. Single-use smartSpatulas help to reduce cross contamination, are resistant to dilute acids and bases, and the unique hollow core minimizes thermal transfer.

smartSpatulas® comply with FDA regulations for food-contact applications, are shatter resistant for liquid nitrogen frozen samples and can also be used as a stir rod or policeman.

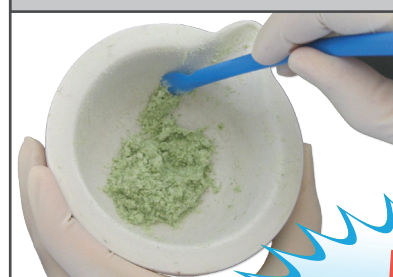

“if you use disposable weigh boats... you **Should** use disposable smartSpatulas!”
