## OP-6602

### FILTER FUNNEL, POLYETHYLENE FRIT

This unique disposable filter funnel system for solid-liquid separation can be used in chemistry and biological laboratories. The system consists of a polypropylene filter funnel with a 10 micron polyethylene fritted disc, a CG-1049-J style glass vacuum adapter, and a flask or vial. The CG-1049-J vacuum adapters are specially designed so that the vacuum can be controlled using a Teflon stopcock to prevent the filtrates from being sucked into the vacuum line. Also, the disposable filter funnels have a 80mm long stem so that the glass vacuum adapter is not contaminated during the filtration process. *U.S. Patent Pending.*

| PART NUMBER | DESCRIPTION                     | TOP STYLE | QTY/ CASE | PRICE   |
|-------------|---------------------------------|-----------|-----------|---------|

### FILTER FUNNEL, POLYETHYLENE FRIT AND DIATOMACEOUS EARTH

This unique disposable filter funnel system for solid-liquid separation can be used in chemistry and biological laboratories. The system consists of a polypropylene filter funnel with **diatomaceous earth/polyethylene fritted disc**, a CG-1049-J style glass vacuum adapter, and a flask or vial. The CG-1049-J vacuum adapters are specially designed so that the vacuum can be controlled using a Teflon stopcock to prevent the filtrates from being sucked into the vacuum line. Also, the disposable filter funnels have a 80mm long stem so that the glass vacuum adapter is not contaminated during the filtration process. *U.S. Patent Pending.*

## OP-6604 FILTER FUNNEL POLYPROPYLENE, PERFORATED SUPPORT

Disposable filter funnel for solid-liquid separation can be used in chemistry and biological laboratories. The molded funnel has a perforated support plate that is designed for use with standard filter paper. Polypropylene filter funnel is designed for use with the CG-1049-J style glass vacuum adapter and a flask or vial. The CG-1049-J vacuum adapters are specially designed so that the vacuum can be controlled using a Teflon stopcock to prevent the filtrates from being sucked into the vacuum line. Also, the disposable filter funnels have a 80mm long stem so that the glass vacuum adapter is not contaminated during the filtration process. *U.S. Patent Pending.*

| PART NUMBER | DESCRIPTION                    | FILTER PAPER SIZE | QTY/ CASE | PRICE   |
|-------------|--------------------------------|-------------------|-----------|---------|
| OP-6604-10  | 20mL Filter Funnel, Disposable | 15mm              | 100       | 122.00* |
| OP-6604-12  | 60mL Filter Funnel, Disposable | 25mm              | 100       | 175.05* |

## CG-1049-J

### ADAPTER, DISPOSABLE FUNNEL, VACUUM, STOPCOCK

Disposable Funnel adapter has a ground glass standard taper outer joint on top that provides a convenient leak free way to connect to the OP-6602, OP-6603 and OP-6604 disposable long stem filter funnels and a taper inner joint or a vial. The unique design of the long stem filter funnel and vacuum adapter makes it unnecessary to clean after each use. The 2mm Teflon stopcock between the outer joint and standard taper inner permits control of the vacuum source. Hose connection is 10mm OD at the largest serration.

| PART NUMBER  | DESCRIPTION  | PRICE EA. |
|--------------|--|-----------|
| CG-1049-J-14 | Adapter, Disposable Funnel, Outer to 14/20 Inner             | 68.33*    |
| CG-1049-J-24 | Adapter, Disposable Funnel, Outer to 24/25 Inner             | 70.42*    |
